## Twelfth Sunday in Ordinary Time

## GOOD NEWS!

The Lord addresses modern-day Job out of the whirlwind.

At the first instant, everything in creation—matter that would expand for 14 billion years; moving, exploding material unfolding into particles, quarks, and then protons and neutrons; collecting into stars, shaping into planets, settling into oceans and land, growing into plants and trees and tiny microbes, forming into animals, fish, birds and people—all this was smaller than a pin prick. All of creation started in an instant—physicists call it a singularity—everything exploding out of an infinitely hot, infinitely small dot, so much smaller than the period at the end of this sentence.

This is a lot for the human imagination to handle.

Science has pushed into the “what” and the “how” of creation. Our equations can push only so far, and then we must stop. The laws of physics cannot be used to understand the earliest bit of the first instant. Our normal equations in physics, our ways of talking about time itself, break down. We know a lot, but we cannot push farther into the starting point with the tools of science. Scientists continue to think about the beginning of the beginning, of course. At this point, they become philosophers. Physics pushes us to metaphysics.

Should we move from there into theology? In a letter written to introduce papers published from a study week of philosophers, theologians, and physicists who met at the Vatican observatory in 1988, Pope John Paul II wrote that science and religion can cleanse each other of their weaknesses by expanding their boundaries so that as they coexist, they flourish.

(Did you know the Vatican had an observatory?)

## FEAST OF THE SACRED HEART OF JESUS

Today, our *Sacred Heart Society* is sponsoring a Special Celebration at 10:30 AM. The human heart has always been considered as the true symbol of Love, because love is necessary to us, as is our physical heart. When we celebrate Jesus' Heart we celebrate His infinite personal love for us. Jesus' love made Him accept death on a cross rather than abandoning us to the evil one. To Jesus' love: honor, praise, and thanksgiving!

### PETER'S PENCE

Today we recall the apostolic journey of Pope Benedict XVI to the United States and his call to us to cast the light of Christ upon the world. We can show our solidarity with the Holy Father and our suffering brothers and sisters abroad through our support of this week's Collection. These funds allow him to provide emergency assistance to victims of war, disaster, oppression, and disease. Please be generous in today's Peter's Pence Collection.
